

# Add Sketch Render to Archicad Add-Ons Folder

To enable the Sketch Render engine within Archicad 27 drag and drop the Sketch Render add-on files and Textures listed in the steps below.

1. **Save** your work and **quit** Archicad 27 Solo.
2. **Download** the following ZIP file from this link: <https://graphisoft.sharefile.com/d-s2c511afc5a7f4d6d84510521d2439564>
3. **Unzip** the file and you will find 2 items:
  - a. A file named **Sketch Rendering Engine.bundle**
  - b. A folder named **SketchTextures**
4. **Drag and drop** the 2 items into the following location:

**macOS:** /Applications/Graphisoft/Archicad 27 Solo (Intel-based Mac)/Add-Ons/Visualisation

**Windows:** C:\Program Files\Graphisoft\Archicad 27 Solo\Add-Ons\Visualisation

5. **Launch** Archicad 27 Solo and now **Sketch** will show as an option in the **Photorendering Settings** palette.
