

## **Products Specifications and Introductions**

### **Introductions:**

Digital pen, and some of them called magic pen, this product has multi functions, such as presentation, wireless tablet, interactive whiteboard, multi touch. Many teachers would like to hold microphone and use wireless tablet during presentation or teaching, but we do not have three hands to do all the things at the same time. For that little function, Creative source successful make this product. Thanks for many teachers gave us a lot of ideas while research and design this product to develop it successfully now. For example:

- **They ask for annotating and drawing while holding microphone.**
- **All the functions of presented pen.**
- **All the functions of wireless tablet.**
- **All the function of interactive whiteboard.**
- **Plug&play.**
- **Multi touch.**
- **It can use in Linux system.**
- **The best price.**
