

ARCHICAD Compatibility with the Newest macOS Release

Apple routinely releases a new version of macOS each Fall. Here is a recommended schedule of when to use the newest macOS with the two latest versions of ARCHICAD.

(For the latest two ARCHICAD Versions only)

Compatible ARCHICAD Versions:

Latest two ARCHICAD Versions, at the time of the new macOS release, will receive compatibility updates to work on the latest version of macOS. Older versions of ARCHICAD should be run on supported older versions of macOS.
