

Archicad slab tool does not have option to show element as projected, cut only or overhead similar to beam tool.

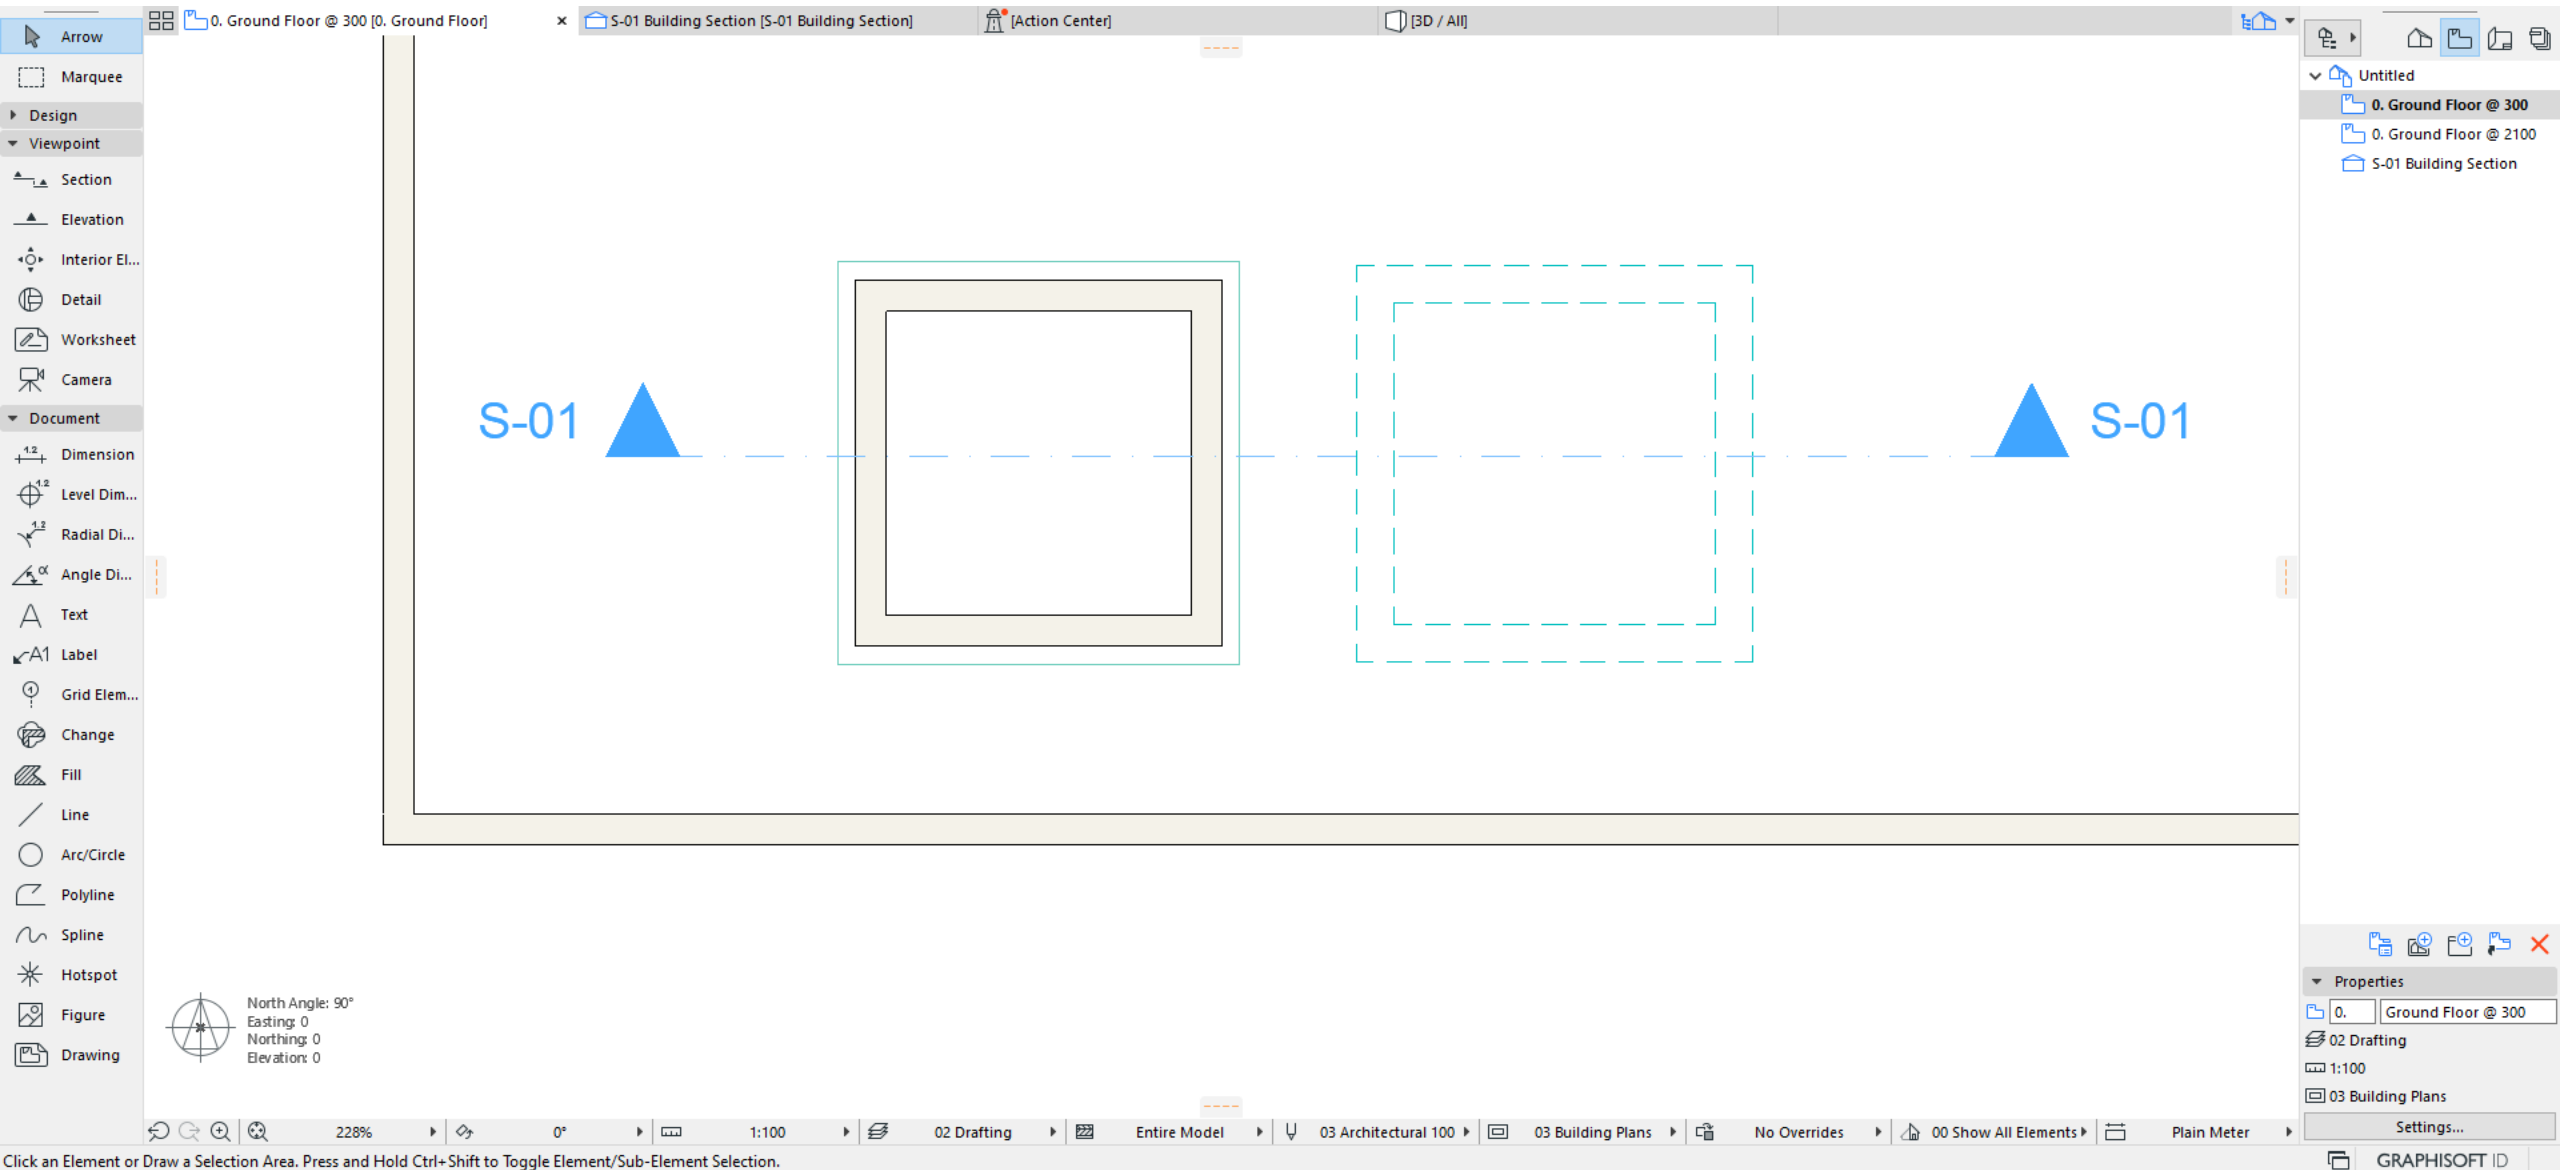

Because of this issue slab does not show correct graphics in plans, cut at different heights for the same floor.

Below section view showing slab & beam height as 1700mm above ground. Also 2 cut planes shown for 2 floor plans.

SECTION VIEW

Below sample floor plan cutting at 300mm height from ground floor. Here beam shows correct graphics as overhead but slab shows incorrect graphics.

Click an Element or Draw a Selection Area. Press and Hold Ctrl+Shift to Toggle Element/Sub-Element Selection.
